

July 2021

Dear Pupil

Welcome to Titus Salt School's Summer Challenge. This is your chance to win fantastic prizes and all you have to do is take part in a mathematics activity.

We encourage you to try as many tasks as possible before you join us in September and to practice your maths over the Summer.

Your task is to design the first ever theme park built on the moon. You will be given a limited budget for rides and attractions and you must carefully decide what your theme park will contain. There is information in your packs, split into 5 sections, which will help you with the design of your theme park. This task will test different areas of mathematics and we will be handing out prizes for the best designs. Remember this is your chance to get creative as well as making sure you stay within the budget given.

We would like all of our future Year 7 pupils to take part in our Summer Mathematics Challenge.

In order to enter, complete each task in your pack and hand in your work to your form tutor in the first week of the autumn term.

Good luck!

Yours faithfully

Mrs Z Asghar
Leader, Maths Transition and KS3 Coordinator
