

Laura Lambert

Q) What years were you at Titus Salt?

2001-2008.

Q) What are you doing now?

I work at Imperial College London as a research scientist testing pre-clinical flu vaccines.

Q) Did you do any Further/Higher Education/ Apprenticeship courses?

After my A Levels, I studied Natural Sciences at Cambridge University and then did a PhD at Imperial College London in 2011, where I researched a lung virus that affects babies. I qualified as a doctor in October 2015.

Q) Did you have a favourite teacher? If so who, and why?

There are too many to mention, but my GCSE Biology and Chemistry teachers were a huge inspiration, and Miss Lockerbie was a tremendous help with my application to university

Summer 2016
