

Peter Graham

Q) What did you study at TSS?

Mathematics, Further Mathematics, IT, Physics and General Studies at A Level.

Q) What are you doing now?

I moved to Japan almost two years ago to see if I liked living there, and took a Japanese language course in Kyoto. I now work with children from two to four years old at an international pre-school. All classes are taught in English so that the children can learn as much natural English as possible.

Q) Any advice for current students?

You don't have to do what everyone else is doing. Choose your own path!
