Our homework policy is to set every pupil an appropriate task each week which will include revision of skills learnt previously as well as extra practice on the topics covered in class. Research suggests that the recommended weekly maths homework time is an hour. To reach this target, and improve your maths skills further, we recommend you regularly target the topics you need to improve on. There are a few ways to do this.

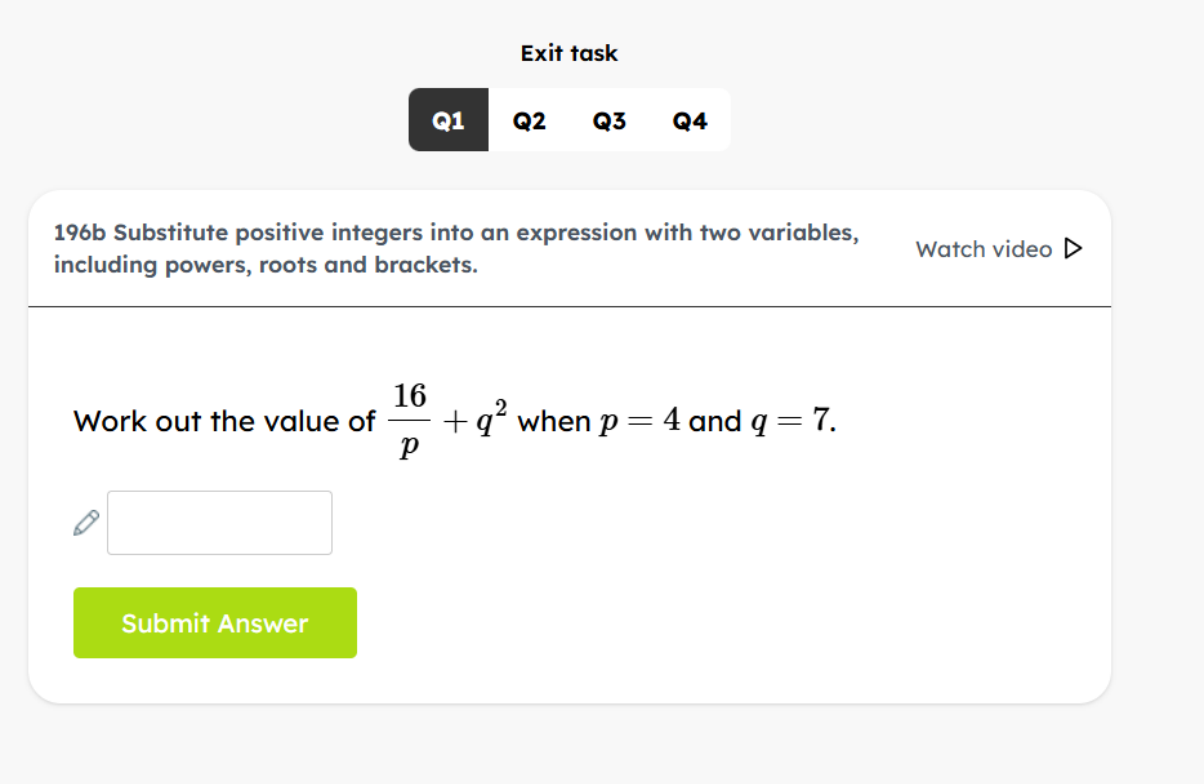

Year 11 pupils will be set a GCSE paper to complete each week.

You can select start a practice from your dashboard or from the menu in the top left corner.

Cleanup gives you questions you have answered incorrectly to have another go.

If you select by topic, you then need to pick the year group and level from the left hand side. For KS3, sets 1, 2 and 3 do v2 and sets 4 and 5 follow the support course. For KS4, use all courses and select the area of the curriculum you are working on.

You can see the accuracy of skills completed and try to complete sections to gain more mastery. More correct questions in a unit will increase your mastery score.

Warning: The exam practice can sometimes generate questions that link to other areas of the curriculum and could be something that has not been taught yet. We recommend that these are only used for KS4.

The more questions you complete the more points and mastery skills you earn. Each week Mr Craven will award the top pupils from each Year group with pupil of the week on Classcharts.

RANK	STUDENT	TOTAL MASTERY	TOTAL POINTS
1	[redacted]	1917	1786
2		1394	1353
3		1909	1098
4		440	874
5		1809	858
6		656	804
7		481	764
8		1353	700
9		548	682
10		1353	643
11		979	637
